

Jordan School District: Our Digital Commitment to be Curious, Intentional, and United.

A Shared Responsibility and Commitment for Students, Staff, and Community

Our Purpose

In Jordan School District, we use technology to bridge the gap between where we are and where we want to be. We view our digital network not just as a set of tools, but as a community space that requires care, intention, and respect.

Digital Citizenship

The practice of responsible, ethical, and effective use of technology and the internet to participate in society, which includes intentionally leveraging digital tools to improve one's school and community.

Digital Wellness

Using technology in ways that help you become your best self, both online and offline.

1. I am a Curious Thinker -

I use technology to explore new ideas and solve complex problems.

- a. Be Curious
 - i. I will be honest in my digital work, citing sources and respecting the intellectual property of others.
- b. Be Intentional
 - i. I will be present in my learning and working environments, using devices as a support rather than a distraction.
- c. Be United
 - i. We will use digital tools to seek different perspectives and learn from others in my community.

2. I am an Empathetic Communicator

I use technology to communicate with empathy and understanding, remaining mindful of the real people in my digital environment.

- a. Be Curious
 - i. I will consider the unique needs, perspectives, and digital access of my community to ensure our collaboration is inclusive.
- b. Be Intentional
 - i. I will stand up for others and report content that is harmful, hateful, or unsafe.
- c. Be United
 - i. We will treat others with dignity in all digital spaces, understanding that our words have a real impact on real people.

3. I am a Creative Problem Solver

I use technology to analyze problems, explore creative options, and think critically.

- a. Be Curious
 - i. I will use digital tools to explore new ideas, experiment with different solutions, and embrace innovative ways to overcome challenges.
- b. Be Intentional
 - i. I will critically analyze data and select the most effective technology to help me solve complex problems and reach my goals.
- c. Be United
 - i. We will collaborate with others to brainstorm inventive solutions and share what we create to help and inspire our digital community.

4. I am a Resilient Lifelong Learner

I use technology to constantly grow, explore, and prepare for my future.

- a. Be Curious
 - i. I will use technology to explore new interests and seek out digital resources that challenge me to grow and try new things.
- b. Be Intentional
 - i. I will notice how I feel when using technology and recognize when it is time to take a break.
- c. Be United
 - i. We will view online mistakes as part of a "productive struggle" to learn better digital habits.

5. I am an Engaged Citizen -

I use technology to engage civilly and treat others with dignity and respect.

- a. Be Curious
 - i. I will look for opportunities to create positive digital content and ensure the online information I share is meaningful and accurate.
- b. Be Intentional
 - i. I will protect my "digital keys" (passwords and accounts) and respect the privacy of others by not sharing their personal information.
- c. Be United
 - i. We will stand up for others and report content that is harmful, hateful, or unsafe.

6. I am a Responsible Teammate

I use technology to build strong, authentic, healthy relationships.

- a. Be Curious
 - i. I will be mindful of the diverse perspectives within my community to support inclusion, strengthen real-world relationships, and help everyone succeed.
- b. Be Intentional
 - i. I will use digital tools that are educationally meaningful, safe, and appropriate, using the network as intended to support learning, teaching, and professional growth.
- c. Be United
 - i. We will care for district-provided technology and hold ourselves and others accountable for using digital tools that meet our standards for safety, responsibility, and purpose.
